Madrid System Success Story: M'Simbi – Spreading Self-Love Globally, One Doll at a Time

July 25, 2023

We have just released a new success story highlighting how the **Madrid System** supports innovative entrepreneurs who want their brand to make a difference even beyond their national borders.

What do you do when society tricks you into believing you do not fit in? You carve your own path and you make your voice heard! This is exactly what Maingalla Moono – former biostatistician and now full-time entrepreneur from Zambia – did when she realized that her daughter did not feel like she complied with traditional beauty standards.

In 2022, the **Zambian Association of Manufacturers** assigned Maingalla the Game Changers Award, as an acknowledgement of her innovative ideas, her sense of leadership and her positive impact on the manufacturing industry. (Photo: MacLean's Photography)

Her little girl motivated Maingalla to find a way to manufacture Black dolls, and to set up her own business - M'Simbi- whose mission is to teach young girls to be proud of their cultural identity and aware of their own unique beauty.

M'Simbi products now range from dolls to backpacks, and from clothes to hair accessories, and are exported to the United Kingdom and the United States of America.

International trademark protection in those countries through the Madrid System is what truly allowed M'Simbi to take off, opening up doors to major international e-commerce platforms.

"I would definitely encourage local entrepreneurs to apply for trademark protection both locally and internationally. When **PACRA (Patents and Companies Registration Agency in Zambia)** told us that you can register your trademark in many countries at once with the Madrid System, it really intrigued us."

— Maingalla Moono

In line with promotional activities and bilateral cooperation between the WIPO Madrid Registry and APIBCO, the Madrid Information and Promotion Division has reviewed the proposed structure and content of Madrid System information for inclusion on APIBCO's new website.

To ensure the accuracy and consistency of information, and to help trademark holders from Antigua and Barbuda to better understand and easily navigate the Madrid System, we recommend the following amendments.

1. Navigation: About IP/Trademarks

- a. Replacement of the proposed navigation text "The Madrid Protocol (International Trademark)" by "The Madrid System (International Trademark Registration)".
- b. Addition of two hyperlinked sub-navigation items for enhanced navigation:
 - "About the Madrid System" (linking to the ABIPCO hosted webpage on the Madrid System (see page 2))

Madrid Trade Marks

How to Protect your TradeMark Internationally

Register your Trade Mark in Antigua and Barbuda before seeking international protection. Typically, a Trade Mark registered locally will provide protection within the geographical boundaries of Antigua and Barbuda. Alternatively, overseas Trade Mark applications can be pursued in two methods:

1. Application can be filed directly with each intended country,

Or

2. A single international application can be filed through Antigua and Barbuda Intellectual Property and Commerce Office selecting the relevant Madrid Protocol countries where protection is required.

Antigua and Barbuda is the only English speaking Caribbean country that is signatory to the Madrid System. The protocol was signed since the year 2000 and is a one stop solution for managing Trade Marks internationally.

The Madrid system simplifies the process for registering a trademark in multiple countries that are signatories to the protocol. An international registration under Madrid system is the same as an application for registration of the mark filed in each of the countries. Once registered you are protected for ten years.

Trademark applications can consist of a word, combination of words, letters, and numerals. Drawings, symbols, three-dimensional features such as the shape and packaging of goods are accepted.
